

Volume 48, 2003

Pages E1312–E1316: Cohen DM, Guthrie PH, Gao X, Sakai R, and Taegtmeier H. “Glutamine cycling in isolated working rat heart.” (<http://ajpendo.physiology.org/cgi/content/full/285/6/E1312>). We would like to correct the statement in the referenced paper (p. 1312) that the study by Ziegler et al. (Ziegler A, Zaugg CE, Buser PT, Seelig J, and Kunnecke B. *NMR Biomed* 15: 222–234, 2002) used an implanted radiofrequency coil. The animal model was closed-chest, and the radiofrequency coil was not implanted.
